#### **BScaler: Visit the Clouds**

Interested in streamlining your business processes, looking for ways to save time and money? Do you want access to your business at any time of the day without the headaches of constantly managing IT projects to achieve this? Welcome to BScaler. They can completely automate your business processes so you can be anywhere at anytime and know exactly what is happening within your business.

BScaler is a Cloud Computing Software development company in Silicon Valley. For the last ten years they have designed and implemented the "Enterprise Resource Manager" software. BScaler's "ERM" automates all business operations for small and medium organizations. ERM software serves like "On-Demand" and means no upfront investment in servers, software licensing or maintenance.

Whether you require a completely automated Enterprise Resource Management solution or want to streamline your business processes or are just looking to save time and money with on-demand access to your business; every BScaler customer receives expert service and continuous innovation at no additional cost.

BScaler, Inc. brings modern technology to improve productivity and eliminate errors for your business and provides the following benefits:

- No upfront investment in servers, software licensing or maintenance
- Centralized Database for Sales, Service, Operations, Finance & Accounting
- No lengthy integration -- we did that already!
- Never a costly upgrade
- Very affordable subscription fees per user (flexible - pay only for what you need)
- Cuts IT & Administrative Costs at least 50%
- Data entered once is immediately available to other users anywhere, 24x7
- Work at home or remote, save energy & commuting time
- Virtual office or on the road
- Paperless system, environmentally friendly (no hard copy & no heat-generating servers)
