- **PORTABILITY:** Reliable access to data
 - **Anytime**
 - **Anywhere**
- **WE GROW WITH YOU:** Ease of scaling as business evolves
- **VALUE:** Lower cost of ownership
- **EVOLVE:** Avoid technology lock-in

BScaler delivers a complete financial management system, easy-to-use and affordable for not-for-profit organizations.

BScaler is intelligent. The system holds all of your operating data in a patent-pending unified database, giving you access to your key performance indicators, and enabling you to make better, faster decisions.

BScaler is integrated. Within a single, powerful application, it combines complete 360-degree view of your operation – from accounting and sales, to fulfillment and support. As a result, it allows companies to unite fragmented data and automate processes from end to end.

BScaler is simple. Implementing our solutions is both faster and less expensive than traditional business applications. As a Web-based, on-demand solution, BScaler significantly reduces your total cost of ownership (TCO).

So . . . Why BScaler?

BScaler allows you to unify key business functions across all departments. Your employees no longer have to re-enter data in different systems, correct inconsistent or inaccurate data, or wait for batch updates. Instead, all your employees view and share accurate data in real time, leading to greater collaboration among departments and increased productivity across your organization.

Increase Visibility, Get Insight, Make Better Decisions

Our system enables intelligent, timely decisions. Additionally, full visibility into unified records across the organization results in far greater efficiency.

Extend Visibility to External Accounting Partners, Donors, and your Board

Given today's need for NFPOs to work closely with their business partners through an extended enterprise, BScaler offers portals that enhance your organizations ecosystem.

Get Superior Value with an Affordable Solution

Built from the ground up specifically for not-for-profits, BScaler is less than \$1.00 per hour per user. Our implementation is quick resulting in an unbeatable TCO. Moreover, you eliminate the costly and time-consuming integration often associated with using a patchwork of applications and disconnected systems.
