

Web-based Financial Management System

Not-for-Profit

No matter what size your not-for-profit organization is, transparency is an operating requirement. As a faithful steward of public monies, you need to accurately track revenue and expenses. With our system you will be able to track funds received and disbursed and associate them with the correct fund class, whether they be permanently restricted, temporarily restricted, or unrestricted (all transactions are identified by User ID, and time and date stamped).

BScaler's comprehensive solution for NPOs is FASB 117 compliant and enables you to keep accurate records with powerful audit trails. We recognize that you require all of the tools of your for profit counterparts, as well as the unique capabilities only applicable to NPOs. By providing you with a complete, integrated set of functionalities, we allow you to move beyond mere data to operating a business with full information. With our system, we deliver a complete set of tools that NPO executives need to make smart, strategic decisions.

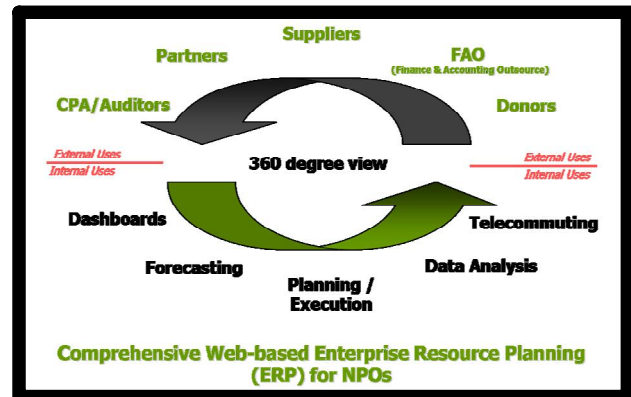

The functionality that you will be able to take advantage of, includes:

- Contact Management System: allowing you to keep in contact with your donors and benefactors
- General Ledger
- Income Statement (Net Assets)
- Statement of Financial Position
- Trial Balance
- A/R and A/P
- Bank Reconciliation
- and so much more

Now, with the BScaler enabled ecosystem and real-time information, you will be able to:

- Maintain great relationships with donors with just a few clicks
- Share timely, accurate information with key stakeholders
- Ensure donated funds are accounted for properly
- Respond to auditor's requests quickly with all the information necessary to provide complete supporting detail.

The BScaler Enabled Ecosystem

Security

To ensure data security and integrity for your organization, BScaler developed a global approach to the three core security areas every data-centric business faces – the data center, the internet, and the application. The list of security practices below is just a highlight of the broad, state-of-the-art security measures we have in place.

The data center includes:

- Access control badges limited to employees required for data center operations
- 24 x 7 x 365 alarmed facility
- Offsite backup
- Battery power and diesel generators in the event of loss of electricity

At the internet level, we utilize:

- SSL Encrypted (banking industry)
- Latest technology firewalls
- Immutable system binaries
- Hardened OS (read only)
- Buffer overflow resistance
- Powerful network monitoring tools

And lastly, the application lets you assign roles to authorized employees (with unique user ID and password) as a level of security that determines who can access what information and how it can be accessed.

Which employees can access what information, and how that information may be accessed.

focus on running your business.

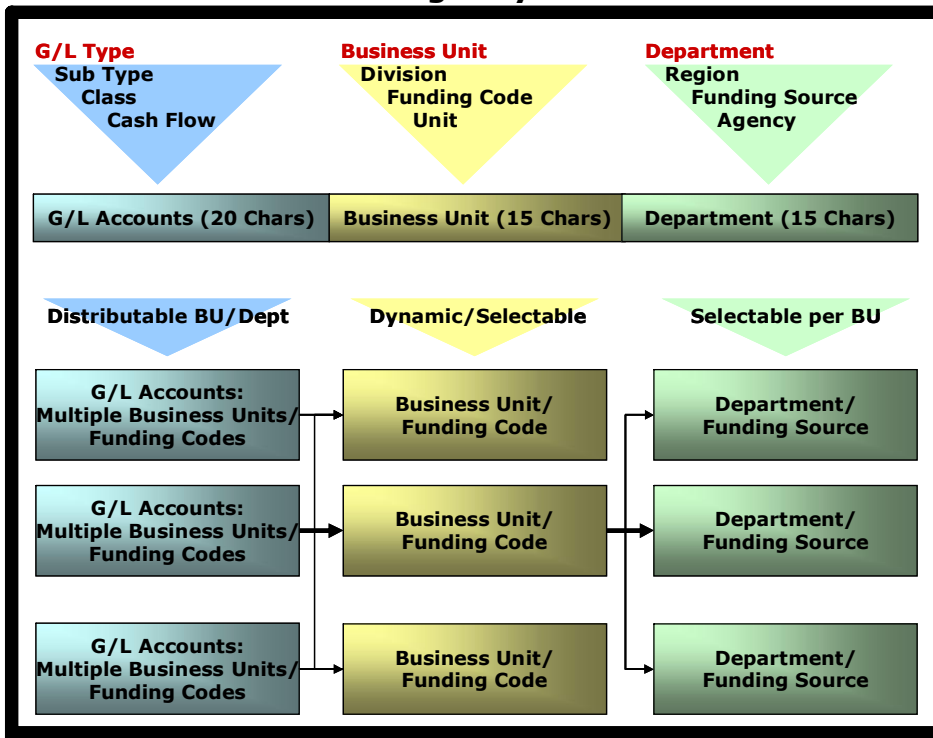

What's more, it is delivered via the Internet, so all you need to do is open your browser, log-on and

use the application. As your organization grows, BScaler will provide you with a seamless migration path – allowing you to add functionality and users as you grow. The result is a low cost, highly effective business tool to drive top-line growth and reduce and control expenses.

Ultimately, NPOs use BScaler to bring clarity to their business processes, accelerate productivity, boost efficiency, and achieve their mandate by providing real-time business insight.

At less than \$1.00 per user per hour, the ROI is measured in months, not years.

BScaler NPO General Ledger System

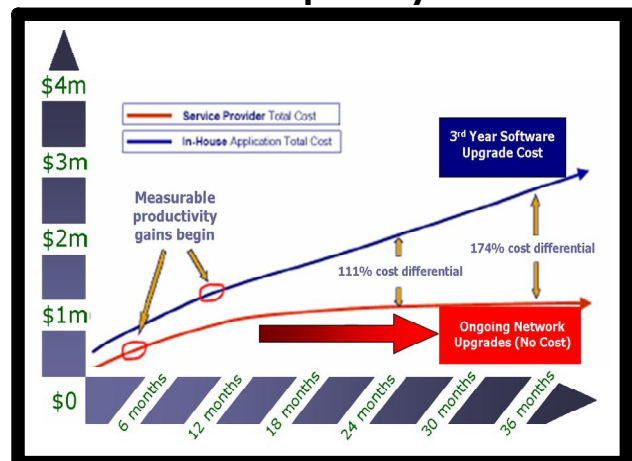

The General Ledger

The GL module is designed specifically for NPOs and provides for a 50 character alpha-numeric sequence to meet your most demanding needs. Several account types have been customized for nonprofit accounting classifications, such as Unrestricted, Temporarily Restricted, Permanently Restricted, and Cash Contributions and Grants.

Why BScaler?

By completely integrating all of the functionality into our patent pending Unified Database, BScaler's comprehensive solution allows you to
